LAND ADMINISTRATION IN MALAYSIA

- The Federal Constitution of Malaysia 1957, the supreme law of the country, prescribes two-tier governmental structure; that is the Federal and State Government.

TORRENS SYSTEM

Two main principles in the Torrens System:

1. Mirror principle

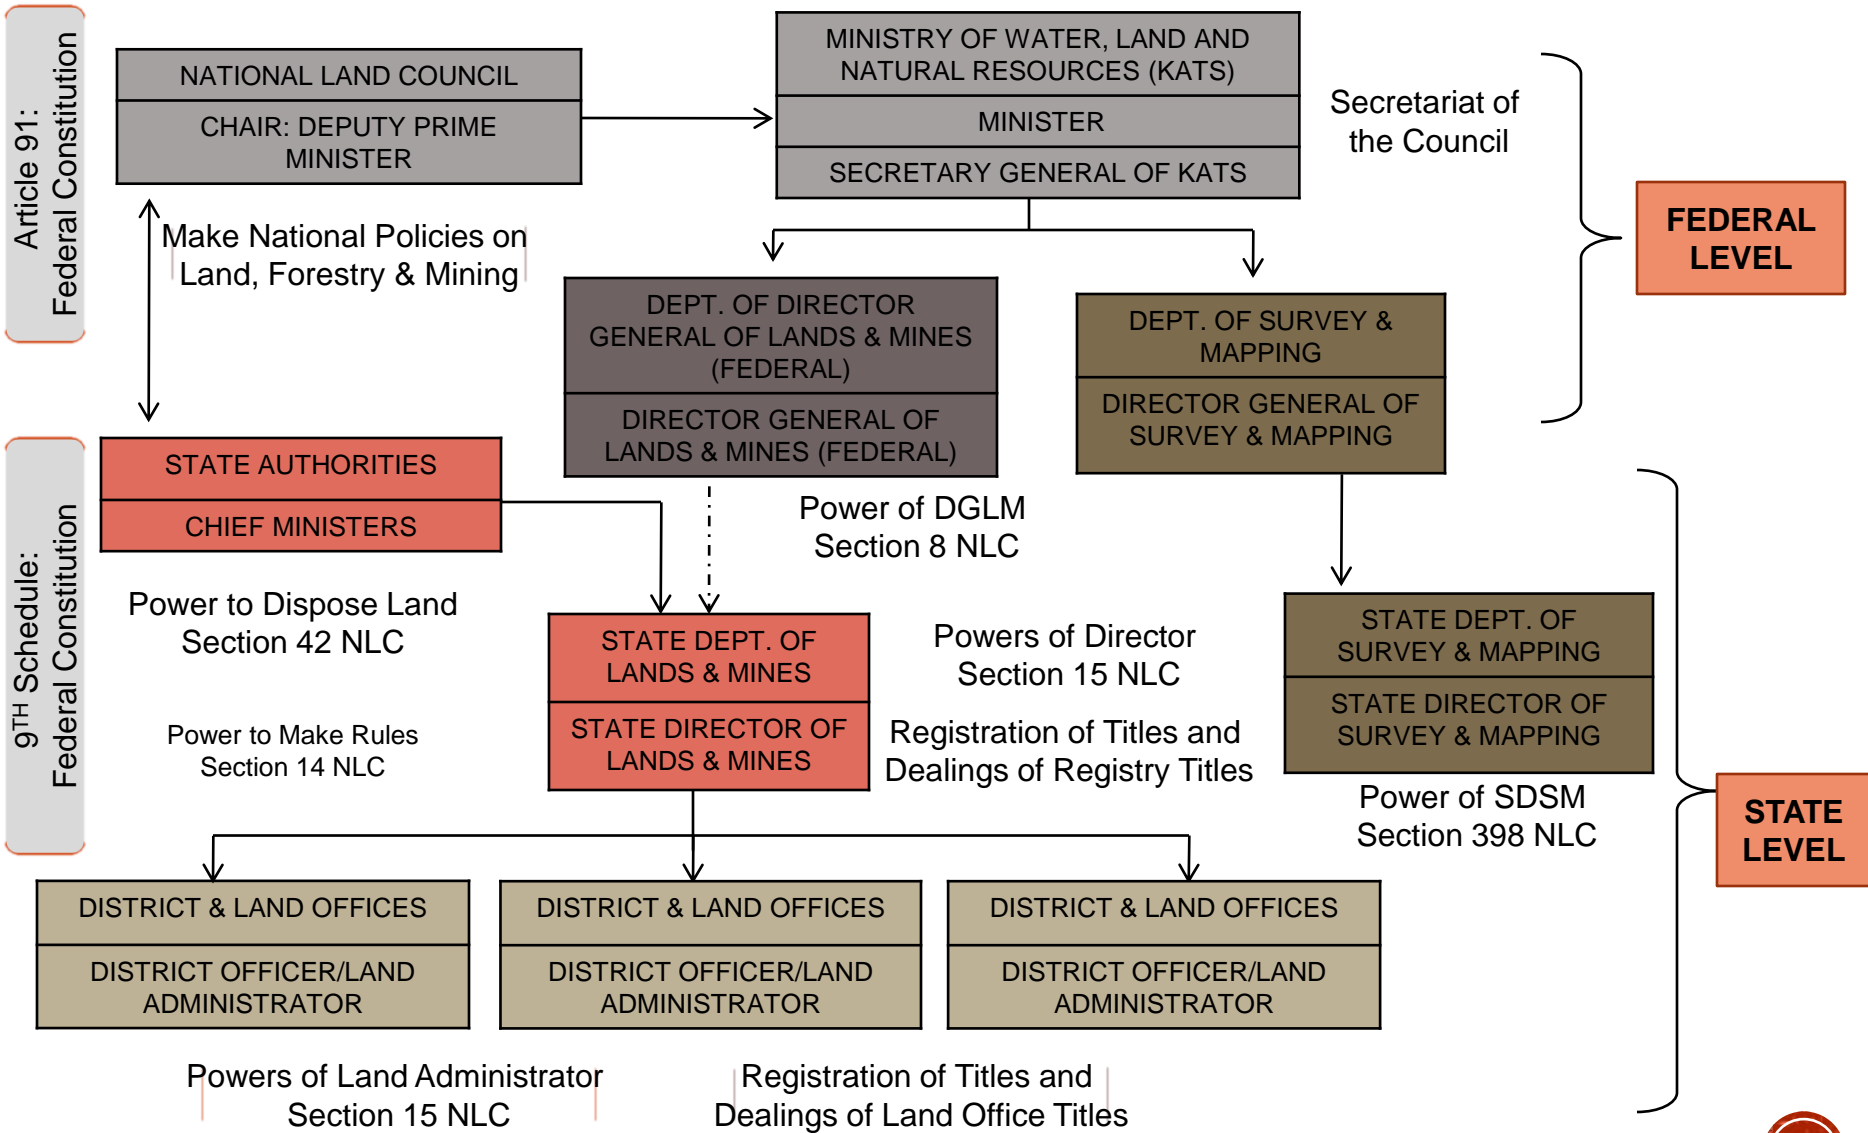

- “The register reflects all facts material to the registered proprietor’s title to land”.
- Endowed the register with the attributes of a mirror that can reveal necessary particulars relating to land

2. Curtain principle

- Emphasizes that the intending purchaser is solely concerned with the register, which, in contemplation of the law, “is the only source of information about the legal title so that he neither need nor may look behind it”.
- In *Teh Bee v K. Maruthamuthu*, Fed Court held ‘under the Torrens system, the register is everything’

The Structure of Land Administration in Malaysia

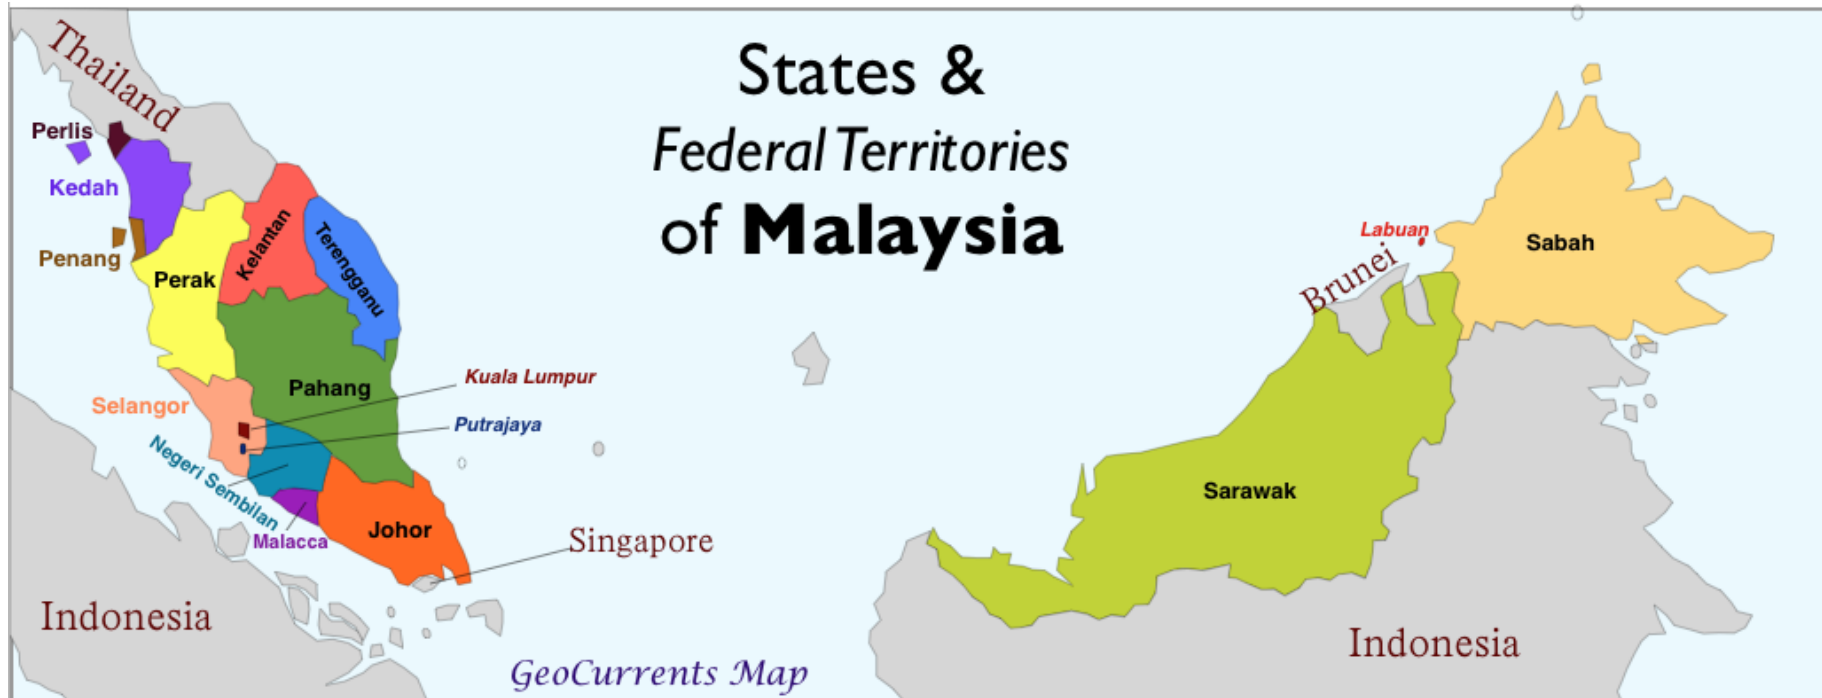

NLC = National Land Code

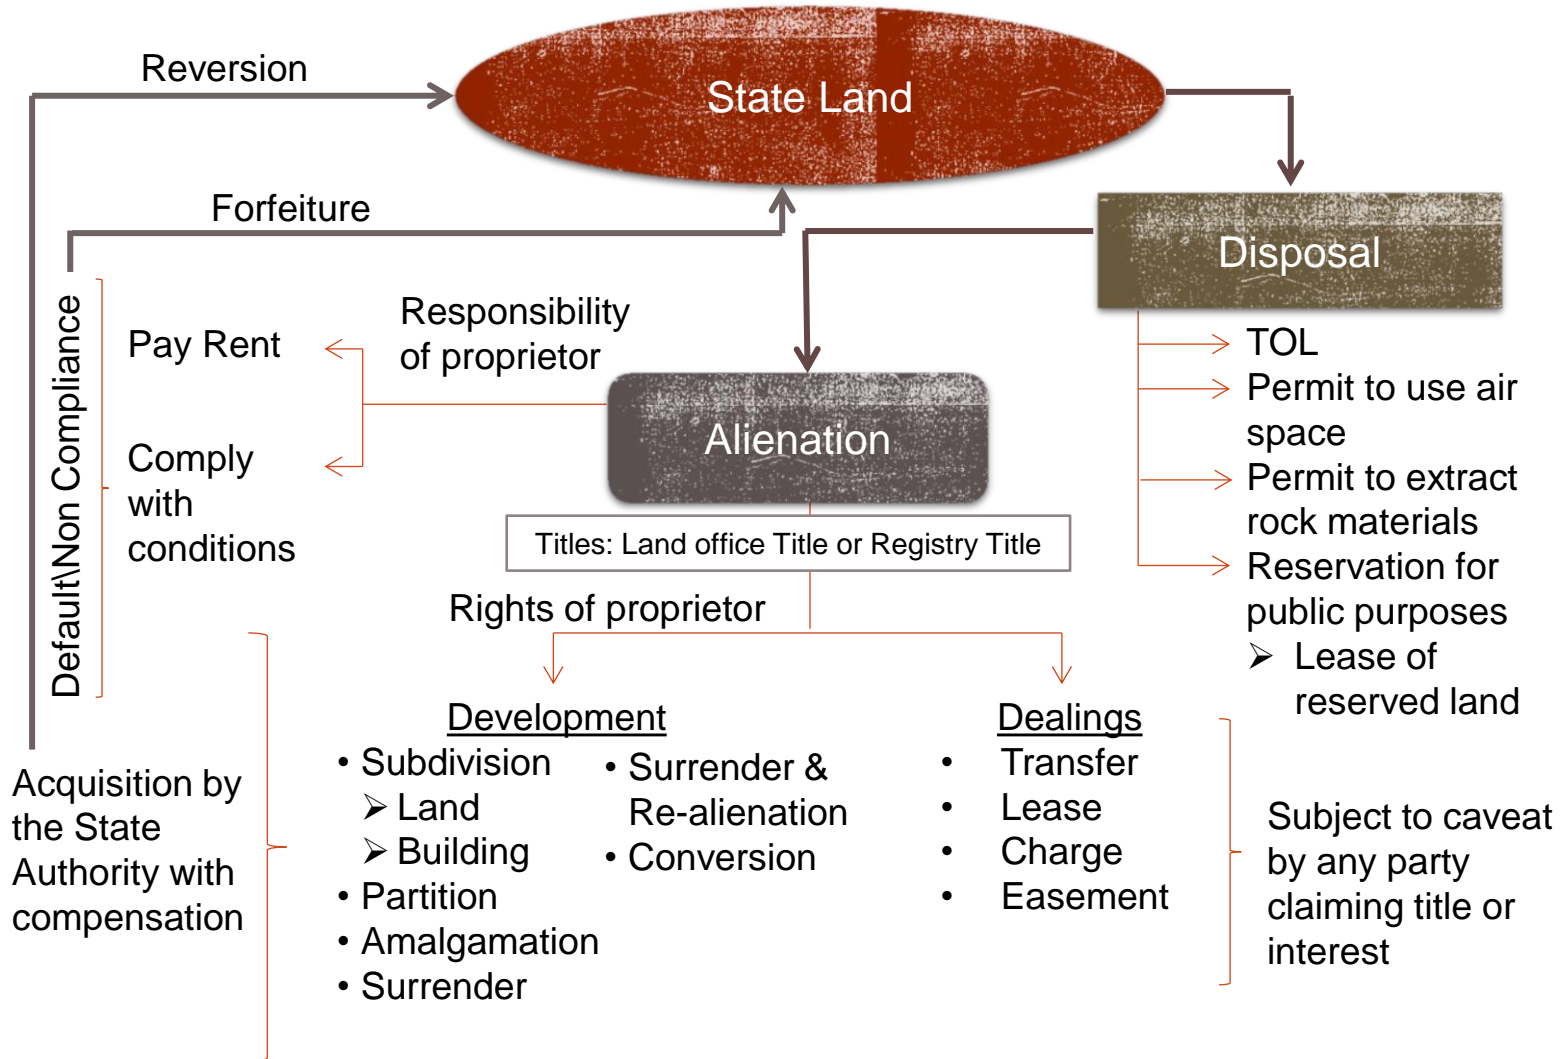

Application of Land Laws in the States of Malaysia

- Uniform Federal laws for States in Peninsula Malaysia, but authority lies with the States.
- Individual State laws for Sabah and Sarawak.
- For Federal Territories, the uniform laws are modified to accommodate jurisdiction of Federal Government.

COMPUTERISATION OF LAND REGISTRATION SYSTEM

Computerisation of Land Registration System

All registration of titles, dealings and non dealings are done via computer at the Land Registry and Land Offices in Peninsular Malaysia.

The migration from manual registration to computerised registration was implemented in 1995 in Federal Territory of Kuala Lumpur before it was followed by other States. It involves conversion of manual titles into computerised titles.

Computerized Land Registration System covers;

- i. Registration of titles;
- ii. Registration of dealings;
- iii. Document verifications prior to registration;
- iv. Land searches;
- v. Presentation Records;
